

PENZIM

LOTION & GEL

WITH ALL NATURAL
MARINE ENZYMES

A few Penzim Testimonials

"I'm sure I haven't discovered all the uses for Penzim yet but I love how it helps with blemishes. They disappear more quickly than with any other product I've tried..." - Pattie C, Edinburgh

"Penzim is too good to be true..." - Joyce K, Birmingham

"Thank you for Penzim. I cannot see myself living without Penzim. I have so many good uses for Penzim. Having started using Penzim on my face and seeing the great results I started using it for varicose veins to rough heels, for stings and other skins problems..."
Virginia L, South London

I used Penzim for a severe holiday earache. Just 2 drops in my ear stopped the throbbing sensation in about 2 hours. I applied two drops to my ear 3 to 4 times a day, by the end of the second day my ear was completely as normal. Had I gone to the doctor, as my wife insisted, I would have been given a course of anti-biotic for 7 days. Thank you Penzim.
Robin B, West Sussex.

When my son was just a few months old he developed dry spots on his skin. Normal moisturisers didn't work so a doctor prescribed corticosteroids for me to apply to the spots. The spots went away but they always came back and I was told only to use the medicine for a few days at a time and it also had the effect of thinning the skin. I decided to try Penzim. The spots gradually got better and after a few months they disappeared altogether.
Sigurros, mother of Darri, age 2:

My son suffered second and third degree burns on his face when hot wax from an outdoor candle splashed on him. In consultation with cosmetic surgeons the burns were washed carefully under a lukewarm shower twice a day and PENZIM applied afterwards. This treatment was used for a week and afterward applied once a day, using Penzim until the burns had healed. They healed well and now, a year later, they have almost disappeared altogether.
Sigridur Olafsdottir:

Just thought I drop you a line to say that I have been using the Penzim since you sent it to me a couple of weeks ago. It is amazing! I have suffered from bad acne due to polycystic ovary syndrome for 6 months now (not very pleasant at the age of 24). Nothing worked on my skin and the products I used all felt harsh and were drying my skin out without stopping the spots. This morning, for the first time in months, I did not need to plaster my face in make-up just so I could leave the house.

This product is amazing! Kind Regards. Gemma Reece
